macOS, Windows Server 2008+

## EDUCATION

### B.S., Computer Science - Pursuing

Indiana University South Bend,  
South Bend, Indiana

### Minor, Mathematics - Pursuing

Indiana University South Bend,  
South Bend, Indiana

## ACCOMPLISHMENTS

- Developed code, system design, and QA tested for a peer to peer, block-chain, messaging and file transfer, encryption program.
- Designed high-traffic website with eCommerce functionality for business.

## EXPERIENCE / REFERENCES

### • Web Developer / IT Support

Weaver Ag & Lawn Equipment, LLC (2013+)  
Wakarusa, IN - (574) 862-1266

Designed and implemented the current website (all revisions 2013+) as well as maintain server activities. Responsibilities include: Update Point of Sale software, develop front end / back end of website, provide support for technical issues, and handle support meetings for dealers and manufacturers.

## PROJECTS

- **Nagato / Ichicode:** F/OS custom-designed library and chat bot for online communities. Currently serves 6,000+ members. Handles async operations, file redirection, chat logging, permissions, image manipulation, and others.
- **Go Encryption Messenger (GEM):** Go-based AES-256 encryption software for block-chain P2P messaging. Includes Electron-based GUI, file sharing, and IP / Port selection.
- **Website:** Ground-up built websites (w/ and w/o CMS), including those responsive pages, customer data, eCommerce, and databases.

- Drafted, implemented, and developed large-scale, non-blocking, remote bots to organize and manage online communities.
- Accomplished Computer Programmer and well-versed in many languages and computer applications.
